Description :

Influence Analysis Performance

Assessment With Conventional And Value Based Concept Of Stock

Return On Food And Beverage Company Registered on the Indonesia

Stock Exchange (IDX) in Year 2005 - 2013 (Supervised by: Yosevin Karnawati, SE, MM)

This study examines the effect of financial performance

assessment with conventional concepts and value based concepts of stock returns on food and beverage companies listed in Indonesia Stock

Exchange (IDX). This study uses the food and beverage industry data published on the Indonesia Stock Exchange (IDX) in 2005 through 2013, there were 11 companies in the sample in the study.

This study uses stock returns as the dependent variable, while the independent variables using the Return On Equity (ROE), Price Earning Ratio (PER), Earning Per Share (EPS) and Economic Value Added (EVA).

Analyses were performed using the Linear Regression Method.

Based on the statistical F test showed that the Return On Equity (ROE), Price Earning Ratio (PER), Earning Per Share (EPS) and Economic Value Added (EVA) significantly influence stock returns with significance level $0.040 < 0.05$. Test statistics indicate only partial variable Return On Equity (ROE) and the variable Price Earning Ratio (PER), which has a significant effect on stock returns, while the other variables had no significant effect.

Keywords: Stock Return, Return On Equity (ROE), Price Earning Ratio (PER), Earning Per Share (EPS) and Economic Value Added (EVA)
