Description :

Influence Analysis Performance

Assessment With Conventional And Value Based Concept Of Stock
Return On Food And Beverage Company Registered on the Indonesia
Stock Exchange (IDX) in Year 2005 - 2013 (Supervised by: Yosevin
Karnawati, SE, MM)

This study examines the effect of financial performance
assessment with conventional concepts and value based concepts of stock
returns on food and beverage companies listed in Indonesia Stock
Exchange (IDX). This study uses the food and beverage industry data
published on the Indonesia Stock Exchange (IDX) in 2005 through 2013,
there were 11 companies in the sample in the study.

This study uses stock returns as the dependent variable, while the
independent variables using the Return On Equity (ROE), Price Earning
Ratio (PER), Earning Per Share (EPS) and Economic Value Added (EVA).
Analyses were performed using the Linear Regression Method.

Based on the statistical F test showed that the Return On Equity
(ROE), Price Earning Ratio (PER), Earning Per Share (EPS) and Economic
Value Added (EVA) significantly influence stock returns with significance
level $0.040 < 0.05$. Test statistics indicate only partial variable Return On
Equity (ROE) and the variable Price Earning Ratio (PER), which has a
significant effect on stock returns, while the other variables had no
significant effect.

Keywords: Stock Return, Return On Equity (ROE), Price Earning Ratio (PER), Earning
Per Share (EPS) and Economic Value Added (EVA)
