Keyword : ANALISIS FINANSIAL OPERASIONALISASI

Description :

One of indonesia's transportation problem is unbalance growth between vehicle and road wide. The lack of government fund and resources to build the highway give a chance to private sector to joint this program so they anticipated by building operating the toll road. Toll road investment need a very large fund so the enterprise must careful analyze the investment by using NPV, IRR and PI to make sure that their investment are feasible. Because any investment are full of uncertainly so they need to predict the influence of cost change and revenue change to Net Present Value, Internal Rate of Return and Profitability Index
