Jurnal Nasional terakreditasi sinta 2 (status under review) 5. Jurnal internasional bereputasi (status under review)

 Latar Belakang	 Hasil dan Manfaat																														
<p>Sudah banyak diketahui bahwa material ferroelektrik telah banyak dikembangkan oleh para peneliti dan diaplikasikan pada berbagai divais elektronik pada industry. Material ferroelektrik yang telah banyak digunakan adalah $PbTiO_3$. Pada perkembangannya pada tahun 2002 uni eropa mengeluarkan peraturan yang melarang penggunaan timbal (Pb) pada aplikasi divais elektronik Karena alasan kesehatan dan lingkungan. Sehingga para peneliti mengalihkan perhatiannya pada material pengganti dengan berbasis material non Pb. Salah satu material kandidat yang telah banyak diterapkan adalah barium titanat.</p>	<p>dari hasil uji DSC didapatkan hasil seperti ditunjukkan pada tabel 1.</p> <p>Tabel. 1 hasil uji EDS barium titanat dengan metode sol gel</p> <table border="1" data-bbox="839 789 1395 1281"> <thead> <tr> <th>Map Sum Spectrum</th> <th></th> <th></th> <th></th> <th></th> </tr> <tr> <th>Element</th> <th>Line Type</th> <th>Weight %</th> <th>Weight % Sigma</th> <th>Atomic %</th> </tr> </thead> <tbody> <tr> <td>O</td> <td>K series</td> <td>18.34</td> <td>0.26</td> <td>56.01</td> </tr> <tr> <td>Ti</td> <td>K series</td> <td>22.46</td> <td>0.20</td> <td>22.92</td> </tr> <tr> <td>Ba</td> <td>L series</td> <td>59.20</td> <td>0.27</td> <td>21.07</td> </tr> <tr> <td>Total</td> <td></td> <td>100.00</td> <td></td> <td>100.00</td> </tr> </tbody> </table>	Map Sum Spectrum					Element	Line Type	Weight %	Weight % Sigma	Atomic %	O	K series	18.34	0.26	56.01	Ti	K series	22.46	0.20	22.92	Ba	L series	59.20	0.27	21.07	Total		100.00		100.00
Map Sum Spectrum																															
Element	Line Type	Weight %	Weight % Sigma	Atomic %																											
O	K series	18.34	0.26	56.01																											
Ti	K series	22.46	0.20	22.92																											
Ba	L series	59.20	0.27	21.07																											
Total		100.00		100.00																											
 Metode	<p>dari hasil tersebut didapatkan bahwa material barium titanat telah terbentuk dengan baik tanpa adanya pengotor.</p>																														
<p>Pada penelitian ini pembuatan material barium titanat dilakukan menggunakan metode sol gel dan dilakukan beberapa uji yaitu DSC</p>	 Ucapan terimakasih																														
 Skema LITABMAS	<p>Penulis mengucapkan terimakasih kepada</p>
