

Implementation of function and duty of Supervisory Board In Supervision to Work Achievement on Application of Internal Regulation For Guaranteeing Optimalization of Hospitals By virtue of the Regulation of Minister of Public Health Number 10 of 2014 On Supervisory Board of Hospital

*The purpose of this thesis writing is in order to know and analyze Implementation of Fuction and Duty of the Supervisory Board of Hospital In Supervision to Hospital In Supervising to Work Achievement On Application of Internal Regulation To Guarantee Optimalization of Hospital Service; and in order to know and analyze Obstructions Exited at Implementation of Fuction and Duty of the Supervisory Board In Supervising to Work Achievement On Application of Internal Regulation To Guarantee Optimalization of Hospital Service. In doing the research in this research, the researcher uses the type of empirical research, namely a research that is donethrough field study that study carefully (especially) primary data wich is also be completed by a material in the form of laws as well as the results of research, the result of study and other reference. The result of this discussion is that the supervisory board at Murni Asih Hospital has not fully done supervision in accordance with the standard and the existing supervisory board has not yet given any positive contribution in bringin into relity gos governance and clean governance. From the result of research, the supervision being done has not yet reflected that there is any existence of increase of work achievement of the hospital. Thus, the supervisory board of Murni Asih Hospital does not implement the provision of article 4 of the regulation of Minister of Public Health of the Republic of Indonesia Number 10 of 2014 on Supervisory Board of Hospital that mention that one of the duties of the supervisory board of hospital is “to supervise implementation of quality control and cost control”; and (b) one of the obstruction experienced by the supervisory board of the hospital to implement its duty and fuction in the matter of supervising the work achievement of the hospital and internal application (hospital by law) is that there is an intervention from the owner of the hospital. This matter is caused by the existence that there is a too careful attitude of the hospital owner, which is unconsciously can cause lack of work achievement of the hospital and the employees thereof in general. This matter causes that the service given by the hospital and the employees especially to the patients is not optimal, that of course, can impede the development of the hospital. Thus, the supervisory board has disregared the provision stipulated in Article 5 of internal regulation (hospital by law) of Murni Asih Hospital.*
