ABSTRACT

The condition of the tourism industry is currently being hit by the Covid pandemic, which has resulted in the industry falling so that the performance of this industry must begin to tighten its operations in the face of the Covid -19 pandemic crisis. Assessment of financial performance, investor hospitality, and many things related to financial factors shown by the respective reports, company size and growth and its reliability so that investors can determine whatever is profitable for this business. The purpose of this study was to analyze the effect of Return on Assets (ROA), Growth, Firm Size, Tangibility on Debt To Equity Ratio and the influence of Return on Assets (ROA) and Firm Size on Debt To Equity (DER) with moderate inflation. 18 hotel companies in Indonesia show that Return of assets does not have a positive effect on Debt to Equity, Growth has a negative effect on Debt to Equity, Firm Size and Tangibility have a positive effect on Debt to Equity, while inflation moderation results do not affect the ROA relationship and Firm Size against Debt to equity (DER). From these results, it is hoped that investors will obtain information and references in investing in the hospitality industry so that investors will benefit.

Keywords: *Return on Asset (ROA), Growth, Size Firm, Tangibility, Debt To Equity (DER).*
