Description: Prepare your students for physical therapy practice with this up-to-date and accessible introduction to the major diseases and disabilities common to children who require physical therapy and the examination techniques

Pediatric Physical Therapy

Author : Jan s Teclin
No. Class: 615.82 TEC p

and interventions commonly used in their rehabilitation. This fifth edition of

Tecklin's **Pediatric Physical Therapy** provides basic medical information regarding common clinical diagnostic categories, followed by coverage of physical therapy evaluation, treatment, and special issues within each diagnostic group. In addition, case studies

accessible online at

thePoint support the book's strong focus on clinical decision-making.

Featuring new chapters on autism and obesity, new authors, the latest research, and much more, this fifth edition continues to provide just the right amount of information needed to prepare students for practice without overwhelming them with unnecessary detail.

Therapeutic Electrophysical Agents

Author : Alain Yvan Belanger
No. Class : 615.83 BEL t

Description : The third edition of *Therapeutic Electrophysical Agents: Evidence Behind Practice*—revised and expanded, with new chapters and ancillary resources and tools on thePoint—is designed to give you the expertise with electrophysical agents you will need in your clinical practice. As with previous editions, the foundation of this book rests solidly and uniquely on evidence from experimental and clinical human trials. The goal of this textbook is to offer all the necessary knowledge, skills, and tools you need to master the practice of therapeutic electrophysical agents. The online resources include new unit conversion and dosimetric calculators, which allows students and practitioners to learn about prescribing treatment and what measurements to think about when dosing, without having to work through all the equations. Also included are new practice questions to help prepare for the Physical Therapy certification exam.

Pathology And Intervention In Musculoskeletal Rehabilitation

Author : Magee David J
No. Class: 616.7 MAG p

Description : Design and implement a rehab program on your own with Pathology and Intervention in Musculoskeletal Rehabilitation, 2nd Edition. Part of Magee's popular *Musculoskeletal Rehabilitation Series*, this pathology text for physical therapists provides clear guidance on patient management relative to specific musculoskeletal pathology, injury, and illness - all based on a sound understanding of basic science and principles of practice. It focuses on the specific pathologies most often seen in the clinic, and discusses the best methods for intervention for the different areas of the body in the context of the tissue-healing model. Each intervention features a rationale, along with the pathology and problem presented; stage of healing; evidence in the literature; and clinical reasoning considerations..

Sports Injury Prevention And Rehabilitation

Author : David Joyce
No. Class : 617.1 JOY s

Description : World-class rehabilitation of the injured athlete integrates best practice in sports medicine and physical therapy with training and conditioning techniques based on cutting-edge sports science. In this groundbreaking new book, leading sports injury and rehabilitation professionals, strength and conditioning coaches, biomechanists and sport scientists show how this integrated model works across the spectrum of athlete care. In every chapter, there is a sharp focus on the return to performance, rather than just a return to play.

Physical Therapy In Women Health

Author : Elkader shehab Abd
No. Class : 615.8 ELK p

Description : Around the world, physiotherapist is an important member of the maternity team for years as physiotherapy is of great value throughout a woman's life in the promotion of good health by preventing or ameliorating a wide range of physical problems. Therefore, we need to look at health issues related specifically to women health. Significantly, this book provides a comprehensive grounding in what it means to be a health professional caring for women. The authors address important issues including pregnancy, antenatal care, labour and postnatal care, menopause and common gynecological and obstetrical problems. In addition, their content draws on personal experience of working with service users and care with women health. This book describes itself a practical handbook.

Foundations Of Clinical Research Applications To Practice

Author : Leslie G. Portney

No. Class : 610.7 POR f

Description: Draw upon the foundations necessary for finding and interpreting research evidence across all healthcare professions.

Revised to reflect the most current changes in the field of clinical research in rehabilitation and medicine, you'll find a growing emphasis on evidence-based practice (EBP) as well as new vocabulary that is being integrated into research and practice across disciplines.

Pathology implication for the physical therapist

Author : Catherine Cavallaro goodman

No. Class : 616.07 GOO p

Description: Understand how a patient's conditions might affect physical therapy and outcomes so that you can design safe and effective interventions. The only pathology textbook written specifically for physical therapists, Pathology: Implications for the Physical Therapist, Third Edition, offers guidelines, precautions, and contraindications for interventions with patients who have musculoskeletal or neuromuscular problems as well as other conditions such as diabetes, heart disease, or pancreatitis. Learn about the cause of these conditions, the pathogenesis, medical diagnosis and treatment, and most importantly, the special implications for the therapist. In addition to addressing specific diseases and conditions, this text emphasizes health promotion and disease prevention strategies and covers issues with implications for physical therapy management, such as injury, inflammation, and healing; the lymphatic system; and biopsychosocial-spiritual impacts on health care.

Guide to evidence-based physical therapist practice

Author : Dianne V. Jewell

No. Class : 615.82 JEW g

Description: Guide to Evidence-Based Physical Therapist Practice, Third Edition provides readers with the information and tools needed to appreciate the philosophy, history, and value of evidence-based practice, understand what constitutes evidence, search efficiently for applicable evidence in the literature, evaluate the findings in the literature, and integrate the evidence with clinical judgment and individual patient preferences and values. This unique handbook marries the best elements of multiple texts into a single accessible guide.
