

## ABSTRAK

Nama : Muhamad Yusuf  
Program Studi : Rekam Medis  
Judul : Tinjauan Kelengkapan Pengisian Ringkasan Pulang  
Pasien Gawat Darurat Umum di RSUP Fatmawati Tahun  
2018

Gambaran tentang kelengkapan pengisian ringkasan pulang pasien gawat darurat umum di RSUP Fatmawati masih ada yang belum diisi oleh dokter IGD. Ringkasan pasien pulang harus terisi lengkap karena memudahkan petugas rekam medis melakukan kodefikasi agar penagihan pembayaran lancar dan petugas kesehatan dilindungi oleh hukum. Tujuan dalam penelitian adalah untuk mengetahui bagaimana kelengkapan pengisian ringkasan pasien pulang gawat darurat umum di Rumah Sakit Umum Pusat Fatmawati. Metode penelitian yang digunakan adalah metode deskriptif analisis yaitu penulis menggambarkan hasil observasi dan menganalisa data-data yang diperoleh di lapangan. Penelitian ini menghasilkan kesimpulan bahwa belum ada SOP yang mengatur tentang kelengkapan pengisian ringkasan pulang pasien gawat darurat umum. Berdasarkan hasil analisis kuantitatif ringkasan pulang pasien gawat darurat diperoleh rata-rata persentase kelengkapan sebesar 70.06%.

Kata Kunci: Ringkasan Pulang Pasien Gawat Darurat, RSUP Fatmawati, Rekam Medis

## ABSTRACT

Name : Muhamad Yusuf  
Study Program : Medical Record  
Title : Overview of Completion of Completing Return Summary  
General Emergency Patients in Fatmawati General  
Hospital Year 2018

*The description of the completeness of filling out the summary of the return home of general emergency patients at Fatmawati General Hospital is still there that has not been filled by an emergency physician. The summary of patients returning home must be filled in completely because it makes it easier for medical records officers to codify so that payment of payments is smooth and health workers are protected by law. The purpose of the study was to find out how complete the filling of summaries of patients returning to the general emergency at Fatmawati Central General Hospital. The research method used is descriptive analysis method, namely the author describes the results of observations and analyzes the data obtained in the field. This study concludes that there is no SOP that regulates the completeness of filling out the summary of the return to general emergency patients. Based on the results of quantitative analysis, the summary of returning emergency room patients is obtained by the average percentage of completeness of 70.06%.*
