

ABSTRACT

TITLE : **OVERVIEW OF DIAGNOSIS ACCORDING TO PATIENTS IN KELURAHAN HALIM II PUSKESMAS**

NAME : **UCIN MUKHTAR**

PROGRAMSTUDI: DIPLOMA III MEDICAL RECORD AND HEALTH INFORMATION FACULTY OF HEALTH SCIENCES ESA UNGGUL UNIVERSITY, JAKARTA IN 2020

Accuracy of coding process is needed to provide information quality. The diagnosis code influence reporting activities and decision-making (WHO),2011). Specific Purpose Identifying SPOs related to the administration of outpatient disease codes in Puskesmas Kelurahan II Halim. Identifying the Accuracy of Encoding for Outpatient Diagnosis at the Halim II Kelurahan Health Center. Identify the obstacles in coding outpatients in the Puskesmas Kelurahan Halim II. The research method used in this paper is a quantitative method. The total population is 450 and to determine the sample using slovin. The sample obtained 81 disease codes. In the sample have 81 these charges in the future the charge the code of a disease. A standard operational procedure the provision of code is not there are. The research results obtained the value of the accuracy of the code with 74 % In accordance with icd 10 disease code And the code tepatan 26% Code whose disease is not in accordance with 10 planned. There is the problem of research conclusion In the encoding of disease Yet to come up with quality of human capital are the profession of medical record Which is specifically responsible for encoding the diagnosis of diseases in public health, To optimize the disease carried out by encoding of medical doctors, A dentist, midwife or a nurse Is majoring in medical record. Where the research results show 21 a code (26 %) the results are inappropriate and take 60 a code (74 %) proper. Be a assessment of recommendations about such things as And training to officers to improve the accuracy of in encoding disease.
