

## **ABSTRACT**

*Title : Review of Family Numbering Numbering System Planning at Blambangan Health Center UPTD in 2019*

*Name : Kasnalinda*

*Study Program: Diploma III Medical Record and Health Information*

*The UPTD Puskesmas Blambangan which is located at Jalan Bangsal Ratu no.1 Blambangan Village, Lampung Utara, the numbering system used is the serial numbering system. In conducting research, the authors conducted interviews with medical record unit officers at UPTD Puskesmas Blambangan, Lampung Utara. It is known that the implementation of taking patient medical records at the UPTD Puskesmas Blambangan does not yet have a Standard Operating Procedure regarding numbering of medical records as a guideline / reference in the numbering system. The process of numbering medical records is done by giving new numbers to patients who come, this causes the patient's medical record is difficult to find and information on patient clinical services becomes unsustainable.*

*The purpose of this study was to find out about planning the family numbering numbering system in UPTD Puskesmas Blambangan Lampung Utara so that the medical record numbering system would be better so that searching for patient medical records was easier and information on patient clinical services was continuous.*

*Key words : Numbering system, medical record, Family Numbering.*
