

ABSTRACT

Name: Syifa
Study Program: Medical Records and Health Information
Title: Picture of Student Motivation of D3 Medical Record and Health Information Program of Esa Unggul University Jakarta in Completing Timely Lecture.

In Indonesia 35.2% of General Hospital does not have Professional Medical Recorders and Health Information. The organization of education and health information education has not graduated about 5,976 people. According to research conducted by Wahyudi (2012) and Hartanto (2016) the cause of students not graduating on time is the lack of student motivation so that students become lazy and cause repetition in the course. The study aims to describe the motivation of the students of D3 Medical Record and Health Information Program of Esa Unggul University Jakarta in completing the lecture on time. This research was conducted at Esa Unggul University in Jakarta in 2017, which is the subject of active medical and health record student study program in semester 6 or semester which still completes Scientific Writing (KTI) of 80 students. This research uses descriptive analysis with cross-sectional design. The results showed that high student motivation of 59% and very high motivation by 41%. The factors that influence the motivation of students of D3 RMIK UEU Jakarta is the condition of the learning environment and the teacher's effort in learning the learners. Family factors or parents also become factors that affect the motivation of students of D3 RMIK UEU Jakarta. It is expected that students of D3 RMIK UEU Jakarta will improve their learning ability to follow positive activities such as: seminar, scientific writing competition, writing PKM and able to increase their interest in choosing Medical Record and Health Information program.

Keywords: Punctual Motivation, Factors Influencing Passive Motivation Punctual, Other Factors Affecting Passive Motivation On Time.
