Title : Verification of Accreditation in accordance with Standard
ICM.19 in Medical Record Installation at Friendship
General Hospital of 2017

Hospital accreditation is an acknowledgment given to the hospital by the Hospital Accreditation Commission (KARS) because it meets the applicable standards for improving the quality of hospital services. One of the elements of accreditation is an element of the assessment of MCI.19 relating to medical records. If the assessment element of MKI.19 is not met then it can be said that the quality of service in a hospital is not good. This research entitled Verification Accreditation according to standard MKI.19 in Installation of Medical Record at General Hospital of Friendship Center Year 2017. The purpose of this research is to know the description of Verification of accreditation according to standard MKI.19. The method of landing is a qualitative descriptive analysis. With data collection techniques by way of observation, interview and literature study. With data collection instrument of interview guides and checklists. And technical data analysis by performing document policy verification, and procedure related to MCI standard 19. The result of the research shows the verification of policy, document and procedure of medical record in accordance with the standard of MKI.19 of 91,09%. Thus, it can be concluded that in RSUP Friendship the achievement of the standard element of the assessment of MCI.19 has been very good. Recommended to General Hospital Friendship to maintain the fulfillment of accreditation standards especially element assessment MKI.19 in Medical Record Installation
