*Title* : *Barber Johnson's Graphic Analysis Year 2015 - 2017 about Efficient Use of Beds in X Hospital.*

*6 Chapters, 73 Pages, 3 Tabels, 4 Pictures, 6 Attachments.*

*The main problem that is found from the first observation result in X Hospital are known there are BOR those are not according to standards thus causing the use of beds not efficient in X Hospital. The purpose of this study is knowing Efficient Use of Beds based on Barber Johnson's Graphic in X Hospital . This study uses descriptive method and the author purposes to get description of Barber Johnson's Graphic Analysis which is supported with interview and observation results. Analysis results of Barber Johnson's Graphic in X Hospital for 2015, 2016 and 2017 is not efficient because the intersection of 4 parameters on Barber Johnson's Graphic 2015, 2016 and 2017 being outside the area efficiently. Due to a reduction that efforts should be made to increase the use of beds, among others by improving the quality of services, increasing marketing strategies and promoting hospitals. If the quality of service increases and marketing strategies are also good it will make patient visits increase and the BOR value will also increase so that the use of beds will be efficient.*
