*Title of KTI: Review of Management of Electronic Medical Records at Puskesmas  
Kecamatan Kebon Jeruk*

*Electronic Medical Record is the computerized activity of the contents of the health record and the electronic process associated with it. The problem of this research is that programs often stop cannot be used (hang), if the program runs sometimes it is very slow. The purpose of this study was to find out an overview of the availability of electronic medical records at Puskesmas Kecamatan Kebon Jeruk. This research method is descriptive method by observation and interview. The results of the study in the management of electronic medical records at Puskesmas Kecamatan Kebon Jeruk are already using the Regional Health Information System with internet-based. Factors that inhibit one of them are interference with slow computer networks. It is expected that the Puskesmas kecamatan Kebon Jeruk that often occurs in the use of electronic medical records.*
