Title: Factors Associated with Unsafe Action Behavior at the Green Sedayu Apartement Project of PT Totalindo Eka Persada in 2018.

Workplace accidents are generally caused by 2 (two) main things, namely unsafe actions and unsafe conditions. Human factors occupy a very important position towards the occurrence of workplace accidents, namely 80% to 85%. Based on this, it can be concluded that human behavior in the form of unsafe actions is an element that plays an important role in causing a work accident. The general objective of this research is to analyze the factors related to unsafe action behavior at PT Totalindo Eka Persada in the green sedayu apartement project in 2018. This study uses a quantitative approach with a cross sectional design. Methods of collecting data with questionnaires, interviews, and observations. Sampling is done by simple random sampling technique on workers. The results of bivariate analysis with the Chi-Square test stated that there was a significant relationship between attitudes (PR = 4.903; CI = 2.706 - 8.709), k3 training (PR = 4.304; CI = 2.348-7.887), and supervision (PR = 2.136; CI = 1,473-3,098) towards unsafe work behavior at PT Totalindo Eka Persada at the Green Sedayu Apartement Project in 2018.

Keywords: unsafe work behavior; unsafe action.
