

ABSTRACT

Name : Sandy Iskandar
Major : Public Health
*Title : Factors Related to Behavior Unsafe Act on Section Workers
Construction at PT.WIKA Project Trans Studio Cibubur 2018*

Based on the report from PT. WIKA Trans Studio Cibubur Project, in the period of October 2016 to September 2017 there were 15 cases with unsafe actions. This unsafe action was the main cause of the accident at PT WIKA's Trans Studio Cibubur project. This study aims to determine the relationship between education, knowledge, age, years of service to unsafe behavior. This research is a quantitative research with cross sectional method. This research was conducted at the Cibubur transpark project. Respondents in this study were 130 pembersian workers. This study uses Chi Square test to determine the relationship between education, knowledge, age, years of service to unsafe behavior. The results of this study indicate education($p=0,046$), knowledge($p=0,012$), age($p=0,000$), years ($p=0,030$) of service on unsafe behavior. The results of this study indicate there is an influence of education, knowledge, age, years of service on unsafe behavior. This study suggested that PT. WIKA provide educational qualification requirements, provide training on K3, hold worker sharing activities.
