

ABSTRACT

Title : Review of Accuracy in Encoding Outpatients' Diseases at UPTD Puskesmas Poncowati Terbanggi Besar

Name : Eva Herlina Lingga

Study Program: Diploma III Medical Record and Health Information

The Poncowati Puskesmas UPTD located in Kampung Poncowati Terbanggi Besar Subdistrict, Central Lampung Regency has an average number of patient visits of 40 people / day. The diagnosis is a description of the disease suffered by the patient. The absence of special coding officers to handle the coding process is a factor that is not yet perfect for all outpatient disease coding in UPTD Puskesmas Poncowati Terbanggi Besar. The purpose of writing this Scientific Paper is to determine the accuracy of the coding of outpatients in UPTD Puskesmas Poncowati Terbanggi Besar. In conducting research, the authors took 90 samples of medical records in the UPTD Puskesmas Poncowati Terbanggi Besar by looking at the next disease code compared to the one contained in the book ICD-10.

In that study, 65 disease codes were found in accordance with ICD-10 (72%), while 25 disease codes were not appropriate (28%). The writer concludes that the coding of outpatients in UPTD Puskesmas Poncowati Terbanggi Besar is still not right. The purpose of writing this Scientific Paper is that the UPTD Puskesmas Poncowati Terbanggi Besar can pay more attention in giving outpatient disease codes in accordance with book ICD-10.

Key words : Accuracy, disease code, outpatients.
