Title : *Analysis of the Effect of Occupational Safety, Health Work and Work Discipline on Productivity Work (Case Study on Production Employees of PT. INOAC Polytechno Indonesia Tangerang Plant)*

Name : **Maulana Ma'ruf Fuaidy MT**

Study Program : **Management S-1**

The purpose of this study was to determine the effect of Occupational Safety, Occupational Health and Work Discipline on Work Productivity. This research was conducted to PT. INOAC Polytechno Indonesia Tangerang Plant with 140 respondents. The research respondents were determined using a non probability sampling method with a purposive sampling technique. Data collection was carried out by distributing questionnaires using a 4-point Likert scale with 32 statements consisting of 7 items about work safety, 10 items about occupational health, 9 items about work discipline and 6 items about work productivity. Data analysis techniques using Multiple Linear Regression Analysis. The results of this study prove that Work Safety partially has a significant effect on Work Productivity. Occupational Health partially has a significant effect on Work Productivity. Work Discipline has a significant effect on work productivity. Work safety, Occupational Health and Work Discipline together (Simultaneously) have a significant influence on Work Productivity.

Key words: *Occupational Safety, Occupational Health, Work Discipline, Work Productivity*
