

**ABSTRACT**

*Title : Study of Santri Bullying Behavior in Boarding School*

*Name : Shafira Salsabila Fadhilah*

*Study Program : Psychology*

*Pondok Pesantren is a place where students deepen religious knowledge under the guidance of ustaz and kiai. The students are educated to be a santri figure who can practice Islamic values into their daily lives. However, there are some cases of bullying behaviour that occurs in boarding schools making people ask about life in boarding schools. The purpose of this study is to find out the picture of bullying behavior in boarding schools. Non-experimental descriptive quantitative research method, with purposive sampling involving 100 santri pondok pesantren. Bullying behaviour measuring instrument amounting to 18 valid items with reliability value  $\alpha=0,824$ . The results showed that there were more santri pondok pesantren did not bully (65%) than those who did (35%). The dominant aspect of bullying is indirect and those who do not do bullying are physical. Santri who have and do not have more gangs do not engage in bullying behaviour. Santri who are given advice and given more sanctions who do not engage in bullying behaviour, while those who are ignored by 100% engage in bullying behaviour. Santri who rarely talk and fight with their parents often engage in bullying behaviour. Only students are with a monthly allowance of >Rp. 750,000 more bullying behaviour.*

*Key Words: Bullying Behaviour, Santri, Pondok Pesantren*
