

ABSTRACT

Title : *The Effect of Current Ratio, Debt to Total Assets Ratio, and Total Assets Turnover on Stock Prices in The Food And Beverages Sub Sector Manufacturing Companies Listed on The Stock Exchange (IDX) Period 2014-2018*

Name : Titis Cahya Ningrum

Study Program : Accounting

This study was conducted to determine the effect of the current ratio, debt to total assets ratio and total assets turnover on stock prices in the food and beverages subsector manufacturing companies listed on the Stock Exchange period 2014-2018.

The type of data in this research is using secondary data which can be obtained from www.idx.co.id or IDX. The sample in this study used purposive sampling techniques that fit the criteria of 70 data. Whereas the data analysis method in this study uses multiple linear regression analysis.

The results of the study can show that the current ratio, debt to total assets ratio and total assets turnover significantly influence stock prices simultaneously or jointly as seen from the F Test. While the results contained in the T Test, indicate that the variable current ratio has a positive effect and significant to the stock price partially, while the variable debt to total assets ratio and total assets turnover has no effect on stock prices.

Keywords : *current ratio, debt to total assets ratio, total assets turnover and stock price.*
