The screenshot shows an IDE window with several tabs open, including 'profil_siswa.xml'. The main editor displays XML code for a form layout. The code includes a ScrollView containing a LinearLayout with a TextView (marquee effect), an ImageView (logo), and three TextInputLayouts. The first TextInputLayout contains a TextInputEditText with the hint 'NIS'. The second TextInputLayout is empty. The third TextInputLayout contains another TextInputEditText. The status bar at the bottom shows '54:1 LF4 UTF-8 Context: <no context>'.

Gambar 4.57. Coding Untuk User Interface Pada Profil Siswa

The screenshot shows an IDE window with several tabs open, including 'Detail_siswa.java'. The main editor displays Java code for the 'Detail_siswa' activity. The code includes package declarations, imports, and a class definition that extends AppCompatActivity. It declares various EditText fields for user input, buttons for 'Proses' and 'Hapus', and a ProgressDialog. It also includes static final strings for success and record messages, and tags for the TextViews used in the UI.
