Android-Based Application to Find an Orphanages for Fundraisers

A Fundraiser is a person or group of people who raise funds for anyone who needs help in fulfilling their life needs. Assistance can be in the form of money, food, clothing, mental support, or educational facilities. There are many groups that need assistance from Fundraisers in Indonesia, one of which is the Orphanage. An Orphanage is a place for underage children and young people who do not have parents and want to get a better place to make them feel safe. Orphanages in Indonesia can be found at the district to city level. Some are easy to reach, some are hard to find. Lack of information about the location of the Orphanage and what the Orphanage needs are a problem for Fundraisers as well as for the Orphanage itself. The Donation that does not suit the Orphanage's needs results in piling up of items at the Orphanage, such as used clothes. This application will provide what information features the Orphanage needs and complete addresses for Fundraisers so that Fundraisers can come to visit and can provide assistance according to what the Orphanage needs at that time. Because most of Indonesian used Android so this application will be develop using Android operating system. The method that being used in this application is RAD(Rapid Application Development). This method is a method that intended for developing short-term software, so that is chosen as the software development method in this developing of application.

Keywords: *Fundraisers, Orphanages, Android Operating System, Rapid Application Development.*
