

ACKNOWLEDGMENTS

In the name of Allah The Most Gracious and The Most Merciful. First and foremost, all praises and thanks to Allah, for His mercy and guidance. It is only because of His endless blessings that enable me to complete this research work as my bachelor's thesis despite of my flaws, limitations, and uncertainties we might face due to COVID-19 pandemic. Peace and prayers be upon His Final Prophet and Messenger, Muhammad, the ideal role model of human beings who has guided us from the darkness to the lightness, and from stupidity to cleverness.

I would like to express my deep and sincere gratitude to my beloved family members: my loving parents, Ir. Rosat Pamungkas and Herususilo Rahayu; my supportive siblings, Pangky and Delita; and my whole big family in Bandung and Yogyakarta. Thank you for the generous support and love they have provided me throughout my entire life, particularly through my journey of pursuing my bachelor's degree in Universitas Esa Unggul and Nanjing Xiaozhuang University.

In the writing of this thesis, I would like to express immeasurable appreciation for the help and support to the following persons who in one way or another have contributed in making this thesis possible:

1. Zhen Ni 老师, as my thesis advisor, who has guided me from the beginning until the completion of the thesis.
2. Dr. Ir. Arief Kusuma Among Praja, MBA., IPU. as the Rector of Universitas Esa Unggul; Dr. Fransiskus Adikara, S.Kom., MMSI. as the Head of Director of International Office at Universitas Esa Unggul; and respectful lecturers in Department of Informatics, Faculty of Computer Science Universitas Esa Unggul.
3. Wangjing and Sophie Mou 老师, who always take care of the international students in Nanjing Xiaozhuang University, especially the students of Software Engineering.
4. The best people I have ever met in my university life: Angga Satya, Umar Faqih, Fitriah Fajri, Albert Yonas Salim No words could express how fortunate I am to have you as my support system.
5. My comrade-in-arms, the students of Software Engineering double degree program class of 2021 and GSInt. We are in this together.
6. My kindhearted senior, Riri Hita Istianah, who have helped me in finding solution and solving problem for to my thesis work.

7. Last but not least, to myself who have done her best and those who cannot be mentioned one by one, who have helped and support me to finish this thesis.

May God bless all of those mentioned above for their sacrifices to become merciful deeds. Along with the completion of this thesis, the author hopes that this small work could be beneficial for the others and could be developed for the better in the future.

Jakarta/Nanjing, May 27th, 2021
