

## ABSTRAK

Judul : Perbedaan Kinerja Petugas Rekam Medis, *Casemix*, dan TPP Berdasarkan Latar Belakang Pendidikan di Rumah Sakit Bhakti Mulia Tahun 2022.

Nama : Betji Nadiana Bissilisin

Program Studi : Rekam Medis Dan Informasi Kesehatan

Latar belakang pendidikan dan kinerja merupakan salah satu komponen penting yang harus diperhatikan dalam pengelolaan unit rekam medis, *casemix*, dan TPP di Rumah Sakit Bhakti Mulia. Tujuan dalam penelitian adalah untuk mengetahui perbedaan kinerja petugas rekam medis, *casemix*, dan TPP berdasarkan latar belakang pendidikan di Rumah Sakit Bhakti Mulia. Metode penelitian menggunakan pendekatan kuantitatif, dengan uji statistik yaitu Uji t *independent*, jumlah responden sebanyak 46 petugas. Data dikumpulkan menggunakan kuesioner yang terdiri dari pendidikan terakhir dan dilihat dari 5 indikator kinerja (kuantitas, kualitas, supervisi, konservasi, kehadiran). Hasil penelitian menunjukkan bahwa petugas dengan latar belakang pendidikan rekam medis dan informasi kesehatan 19,6% rata-rata kinerjanya sebesar 3,719, dan petugas dengan latar belakang pendidikan non rekam medis dan informasi kesehatan 80,4% rata-rata kinerjanya 3,416. Berdasarkan hasil uji statistik, uji t *independen*, didapatkan nilai  $p < 0,05$  maka hipotesis nol ( $H_0$ ) di tolak. Artinya ada perbedaan yang bermakna antara kinerja petugas rekam medis, *casemix*, dan TPP berdasarkan latar belakang pendidikan di Rumah Sakit Bhakti Mulia Tahun 2022.

**Kata Kunci:** Latar belakang pendidikan, Petugas, Kinerja.

## **ABSTRACT**

*Title : Differences in the Performance of Medical Record Officers, Casemix, and TPP Based on Educational Background at Bhakti Mulia Hospital in 2022.*

*Name : Betji Nadiana Bissilisin*

*Study Program : Medical Records And Health Information*

*Educational background and performance are important components that must be considered in the management of the medical record unit, casemix, and TPP at Bhakti Mulia Hospital. The purpose of this study was to determine the differences in the performance of medical record, casemix, and TPP officers based on educational background at Bhakti Mulia Hospital. The research method uses a quantitative approach, with a statistical test, namely the independent t test, the number of respondents is 46 officers. Data were collected using a questionnaire consisting of the latest education and viewed from 5 performance indicators (quantity, quality, supervision, conservation, attendance). The results showed that officers with an educational background of medical records and health information of 19.6% had an average performance of 3,719, and officers with an educational background of non-medical records and health information of 80.4% had an average performance of 3,416. Based on the results of statistical tests, independent t-test, obtained p value <0.05, the null hypothesis ( $H_0$ ) is rejected. This means that there is a significant difference between the performance of medical record officers, casemix, and TPP based on educational background at Bhakti Mulia Hospital in 2022.*

**Key words:** *Educational background, Officer, Performance.*
