

## ABSTRAK

Nama : Athirah Iwani Rahman  
Judul : Gambaran Pengisian Formulir Asesmen Keperawatan Instalasi Gawat Darurat Di RSUD Kembangan.

Program : D-III Rekam Medis dan Informasi Kesehatan  
Studi

Triase adalah tindakan untuk memilah/mengelompokkan korban berdasarkan beratnya cedera, kemungkinan untuk hidup, dan keberhasilan tindakan berdasar sumber daya (SDM dan sarana) yang tersedia. Tujuan penelitian ini untuk mendapatkan gambaran mengenai kelengkapan pengisian formulir triase instalasi gawat darurat di RSUD Kembangan. Metode penelitian yang digunakan adalah deskriptid dengan pendekatan kuantitatif. Penelitian ini dilakukan di RSUD Kembangan dengan jumlah sampel 96 formulir triase. Hasil penelitian menunjukkan bahwa rata-rata kelengkapan pada pengisian formulir triase di RSUD Kembangan sebesar 88,29%. Pada komponen identifikasi pasien sebesar 99,25%, Komponen Kelengkapan Catatan yang Penting sebesar 85,28%, Komponen Aumentikasi Penulis sebesar 98,33%, dan komponen Catatan yang Baik sebesar 70,33%. Di RSUD Kembangan ini sudah terdapat SPO pengisian formulir triase dan semuanya bejalan sesuai dengan prosedur.

Kata kunci: analisis kuantitatif, formulir triase, ketidaklengkapan

## **ABSTRACT**

*Name* : Athirah Iwani Rahman

*Title* : *Overview of Filling in the Emergency Installation Triage Form at the Kembangan Hospital*

*Study Program* : *D-III Medical Records and Health Information*

*Triage is an action to sort/group victims based on the severity of the injury, the possibility to live, and the success of the action based on the available resources (human resources and facilities). The purpose of this study was to obtain an overview of the completeness of filling out the emergency installation triage form at the Kembangan Hospital. The research method used is descriptive with a quantitative approach. This research was conducted in RSUD Kembangan with a total sample of 96 triage forms. The results showed that the average completeness of the triage form filling in RSUD Kembangan was 88.29%. The patient identification component is 99.25%, the Important Notes Completeness component is 85.28%, the Author Authentication Component is 98.33%, and the Good Notes component is 70.33%. At this Kembangan Hospital, there is an SOP for filling out triage forms and everything is running according to the procedure.*

*Keywords: quantitative analysis, triage forms, incompleteness*
