

ABSTRAK

GAMBARAN PERSEPSI MASYARAKAT TERHADAP EFEKTIVITAS VAKSIN COVID-19

Ratih Pambudi
Program Studi Psikologi

Persepsi masyarakat terhadap vaksin Covid-19 adalah suatu tanggapan dari masyarakat terhadap vaksin Covid-19, hal tersebut terjadi karena banyaknya hoax yang beredar mengenai vaksin Covid-19. Penelitian ini bertujuan untuk melihat gambaran persepsi masyarakat terhadap efektivitas vaksin Covid-19. Penelitian ini bersifat kuantitatif deskriptif dengan menggunakan teknik *nonprobability sampling* jenis *accidental sampling*. Sampel penelitian berjumlah 130 responden, dengan usia 18-40 tahun. Instrumen yang digunakan pada penelitian ini adalah skala persepsi yang memiliki reliabilitas (α)= 0.852 dengan jumlah 15 aitem. Hasil penelitian menunjukkan bahwa lebih banyak masyarakat yang memiliki persepsi negatif terhadap efektivitas vaksin Covid-19 sebesar 55.4%. Selanjutnya, aspek dominan dari persepsi positif masyarakat terhadap efektivitas vaksin Covid-19 adalah aspek kognitif. Hasil tabulasi silang antara persepsi dengan Pendidikan menunjukkan bahwa Pendidikan SMA/SMK paling banyak memiliki persepsi negatif (56.7%), dengan pekerjaan yaitu pekerjaan Wiraswasta paling banyak memiliki persepsi positif sejumlah 22 orang (66.7%), dengan efek samping setelah di vaksin responden yang tidak merasakan efek samping paling banyak yaitu persepsi negatif sebesar 44 orang (60.3%), dengan lokasi vaksin paling banyak responden yang melaksanakan vaksin di Kelurahan dan memiliki persepsi negatif sebesar 13 orang (68.4%), dengan sumber informasi responden memiliki persepsi negatif paling banyak mendapat informasi mengenai vaksin yaitu dari Televisi sebanyak 5 orang (62.5%).

Kata kunci : Persepsi, Efektivitas Vaksin Covid-19

ABSTRACT

THE DESCRIPTION OF COMMUNITY PERCEPTION ON THE EFFECTIVENESS OF THE COVID-19 VACCINE
