This study aims to analyze the Effect of Profitability, Leverage, and Corporate Social Responsibility (CSR) on Tax Avoidance in automotive subsector manufacturing companies that are Listed on the Indonesia Stock Exchange (IDX) in 2014-2018. Profitability is measured by Net Profit Margin (NPM) measured by Net Profit divided by Net Sales, Leverage is measured by Debt to Asset Ratio (DAR) as measured by total liabilities divided by total assets, and Corporate Social Responsibility is measured using GRI G4 while disclosure of the Avoidance index tax is measured using the effective tax rate (ETR) minus the Cash Effective Tax Rate (CETR).

The method used is purposive sampling. The number of samples used in this study were 38 automotive companies listed on the Indonesia Stock Exchange (IDX) in 2014-2018. The type of data is secondary data sourced from financial reports and annual reports. The data analysis method used is multiple linear regression analysis.

The results of hypothesis testing indicate that simultaneous profitability, leverage, and corporate social responsibility significant influence on tax avoidance. Partially, corporate social responsibility (CSR) have a significant influence on tax avoidance. While partially, profitability and leverage variables do not affect Tax Avoidance.
