PT. H is a company engaged in the manufacturing sector that produces roof roofs to be marketed domestically. PT. H is located in the Kalisabi area of Tangerang City. Every day PT. H has achieved production targets, performance targets can be met if employees who work at PT.H can show good work discipline which is marked by understanding the applicable regulations, compliance and obedience to standard rules and giving penalties in case of violations. The purpose of this study was to see a description of the work discipline of PT.H employees in Tangerang. The design of this research is descriptive quantitative research, non-probability with the type of random sampling sampling technique, and a sample of 77 employees of PT.H. The method of data collection was carried out by the questionnaire method from the work discipline scale with reliability (α) 0.924 and valid items as many as 35. The results showed that the employees of PT. H has low work discipline (54.5%), with the dominant aspect of understanding the applicable regulations (48%). Employees of PT. H who has violated the rules, has a salary of > 5 million/month, has received a reduction in allowances, has never received the most rewards for low work discipline. Employees who earn 3-5 million who have received a warning letter at most have high work discipline.
