LEMBAR PENJELASAN RESPONDEN

Penelitian ini adalah penelitian jenis kuantitatif dengan desain penelitian Quasi Eksperimen (rancangan penelitian eksperimen semu) dengan rancangan sebelum dan sesudah intervensi menggunakan satu kelompok atau one group pre and post test design. Penelitian ini dilakukan dengan memberikan produk stik ikan untuk dikonsumsi oleh responden selama 21 hari dan melakukan pengukuran berat badan dan tinggi badan sebelum dan sesudah pemberian produk.

Penelitian ini mengambil responden dari siswa perempuan di SMPN 3 Rangkasbitung, Lebak. Adapun manfaat dari penelitian ini adalah untuk dapat mengetahui pengaruh pemberian stik ikan berbasis ikan teri, isolat protein kedelai dan kacang bogor terhadap status gizi pada remaja putri.

Partisipasi responden bersifat sukarela tanpa paksaan dan bila tidak berkenan dapat menolak atau sewaktu-waktu dapat mengundurkan diri tanpa adanya pemberian sanksi apapun. Semua informasi dan hasil pemeriksaan yang berkaitan dengan privasi akan dijaga kerahasiaannya. Semua data tidak akan dihubungkan dengan identitas.
