Cascading Style Sheet (CSS)

1. css.css

```
/* CSS Document */
```

```

body {
    font: 100%/1.4 Verdana, Arial, Helvetica, sans-serif;
    /*background: rgb(232,189,22);*/
    background: rgb(199,248,190);
    margin: 0;
    padding: 0;
    color: #000;
}

```

```
/* ~ ~ Element/tag selectors ~ ~ */
```

ul, ol, dl { /* Due to variations between browsers, it's best practices to zero padding and margin on lists. For consistency, you can either specify the amounts you want here, or

on the list items (LI, DT, DD) they contain. Remember that what you do here will cascade to the .nav list unless you write a more specific selector. */

```
padding: 0;
margin: 0;
}
```

```
h1, h2, h3, h4, h5, h6, p {
```

```
margin-top: 0; /* removing the top margin gets around an issue where
margins can escape from their containing div. The remaining bottom margin will hold it
away from any elements that follow. */
```

```
padding-right: 15px;
padding-left: 15px; /* adding the padding to the sides of the elements within
the divs, instead of the divs themselves, gets rid of any box model math. A nested div
with side padding can also be used as an alternate method. */
}
```

```
a img { /* this selector removes the default blue border displayed in some browsers
around an image when it is surrounded by a link */
```

```
border: none;
}
```

```
/* ~~ Styling for your site's links must remain in this order - including the group of
selectors that create the hover effect. ~~ */
```

```
a:link {
```

```
color:#414958;
text-decoration: underline; /* unless you style your links to look extremely
unique, it's best to provide underlines for quick visual identification */
```

```
}
```

```
a:visited {
```

```
color: #4E5869;
text-decoration: underline;
```

```
}  
a:hover, a:active, a:focus { /* this group of selectors will give a keyboard navigator the  
same hover experience as the person using a mouse. */  
    text-decoration: none;  
}
```

```
/* ~~ this container surrounds all other divs giving them their percentage-based width  
~~ */  
.container {  
    width: 90%;  
    height: 100%;  
    background: #FFFFFF;  
    margin: 0 auto; /* the auto value on the sides, coupled with the width, centers  
the layout. It is not needed if you set the .container's width to 100%. */  
}
```

```
/* ~~the header is not given a width. It will extend the full width of your layout. It  
contains an image placeholder that should be replaced with your own linked logo~~ */  
.header {  
    background: #DCDCDC;  
    border-bottom: 2px solid rgb(232,189,22);  
    width: 100%;  
    height: 20%;  
    margin: 0 auto;  
}
```

```
.menu {  
    background: rgb(50,50,50);
```

```

text-align: right;
border-bottom: 2px solid rgb(232,189,22);
clear: both;
}
/* ~~ This is the layout information. ~~

```

1) Padding is only placed on the top and/or bottom of the div. The elements within this div have padding on their sides. This saves you from any "box model math". Keep in mind, if you add any side padding or border to the div itself, it will be added to the width you define to create the **total** width. You may also choose to remove the padding on the element in the div and place a second div within it with no width and the padding necessary for your design.

```

*/
.content {
    padding: 10px 10px;
    height: 800%;
}
.content p{font-size: 12px; padding: 0px ;}
.content .tbl {
    width: 100%; font-size: 12px;
    font-family: Tahoma, Geneva, Verdana, sans-serif;
}
.content .tbl .head{text-align: center; background-color: rgb(228,228,228); font-weight:
bold;}
.content .tbl .headDetail{text-align: left; background-color: #E8BD16; font-weight:
bold; padding-left:5px; border-bottom: 1px solid black; border-right: 1px solid black;}
.content .tbl .point{text-align: center; background-color: #E8BD16; font-weight: bold;
border-bottom: 1px solid black; border-right: 1px solid black;}

```

```
.content .tbl a{text-decoration: none; color: rgb(0,51,255);}
.content .tbl a:hover{text-decoration: underline; color: rgb(255,0,0);}
.content .tbl .grid-data{text-align: center;}
.content .odd{background-color: #FFFFFF;}
.content .even{background-color: #D7D7D7;}
