

ABSTRAK

Handayani, Andi. 2015. *Pengaruh Trait Kepribadian Terhadap Gaya Hidup Hedonisme Pramugari Maskapai LA.* (Dibimbing oleh Dra. Sulis Mariyanti, M.Si. Psi dan Sri Handayani, SE, MM, MAK)

Tuntutan profesi pramugari untuk selalu tampil cantik dan menarik serta menjaga *image* perusahaan mengarahkan mereka pada gaya hidup hedonisme. Pramugari memiliki perbedaan cara dalam melakukan aktivitas gaya hidup hedonisme. Salah satu faktor yang mempengaruhinya adalah *trait* kepribadian yang dimiliki oleh setiap pramugari. Tujuan dari penelitian ini untuk melihat gambaran *trait* kepribadian pramugari, mengetahui pengaruh *trait kepribadian* terhadap *gaya hidup hedonisme* pramugari maskapai LA dan perbedaan gaya hidup hedonisme berdasarkan *trait* kepribadian.

Rancangan penelitian ini adalah kuantitatif dengan teknik *probability sampling* dan *jenis simple random sampling*, berjumlah 328 pramugari LA. Koefisien reliabilitas dari alat ukur *trait* kepribadian yaitu (α) = 0,937 dan gaya hidup (α) = 0,847.

Hasil uji Zscore, *trait conscient* paling dominan dengan skor 81, dan pada uji anova *trait* kepribadian terhadap gaya hidup hedonisme diperoleh nilai sig (p) = .000 ($p < 0.05$) Artinya terdapat pengaruh signifikan *trait* kepribadian terhadap gaya hidup hedonisme. Selanjutnya berdasarkan hasil uji post hoc pada Anova diperoleh hasil perbedaan yang significant gaya hidup hedonisme pada *trait* kepribadian *conscientiousness* dan *neurotisme*.

Kata kunci: *trait* kepribadian, gaya hidup hedonisme, pramugari

ABSTRACT

Handayani, Andi.2015. Personality Trait Influence On The Hedonism Lifestyle Flight Attendants "LA". (Supervised by Dra. Sulis Mariyanti, M.Si. Psi and Sri Handayani, SE, MM, Mak).

Flight attendant profession demands to look beautiful and attractive, directs them to do hedonism. As well as, flight attendant as its brand company image its one of the reason they do hedonism and they do in different ways. One of the factors that influence hedonism lifestyle is a personality trait which have by each people. The purpose of this study is to see representative of a personality trait determine the influence of personality traits with hedonism life style and hedonistic lifestyle differences based on trait personality.

The design of this study is a quantitative with *probability sampling and simple random sampling*. Total sample in this research is 328 flight attendants PT. LA. The coefficient of reliability of the measuring instrument trait of personality (α) =0.937 and measuring the hedonism lifestyle (α)= α .0,847.

Z-score result is a trait conscientiousness, ANOVA test results of the personality trait of the hedonistic lifestyle that the value sig (p) =.000($p<0.05$) means that there is a significant influence on the personality trait hedonistic lifestyle. Further more,based on the results of the ANOVA post hoc test result hedonistic lifestyle differences in trait personality trait conscientiousness and neuroticism have significant differences compared to the other trait.
