Bab 1 Latar Belakang

ICCSAI 2021 merupakan seri konferensi pertama kali sebagai hasil sinergi antara pemerintah, universitas lokal dan internasional untuk meningkatkan kualitas dan kuantitas publikasi dan menciptakan budaya menulis artikel ilmiah khususnya di lingkungan LLDIKTI III. Kegiatan ini diselenggarakan pertama kali pada 28 Oktober tahun 2021 dengan Host Universitas Bina Nusantara. Kegiatan ini diselenggarakan bersama oleh beberapa universitas co-host regional LLDIKTI III sebagai berikut:

- Universitas Tarumanegara
- Universitas Gunadarma
- Universitas Pancasila
- Universitas Mercubuana
- Universitas Esa Unggul
- STMIK Jakarta & STI & K
- Universitas Budi Luhur

Dengan sinergi ini, diharapkan kegiatan ini dapat mendorong penulis dari kalangan mahasiswa, dosen, peneliti, praktisi dari seluruh dunia untuk mempublikasikan ide dan penelitiannya dalam bidang ilmu komputer, kecerdasan komputer, dan teknologi informasi. Kegiatan ini diharapkan dapat menjadi media untuk mengelaborasi kerjasama *multi stakeholder* dalam rangka pengembangan keilmuan Ilmu Komputer.

ICCSAI 2021 mengangkat tema “*Capturing the Role of Computer Science and Information Technology in Society 5.0*” dengan 4 jalur utama, yaitu 1) *Computer Science*, 2) *Image Processing & Computer Vision*, 3) *Information Systems*, dan 4) *Computer Systems*.

Pada kesempatan ini, saya turut berpartisipasi sebagai penulis artikel bersama dengan 5 penulis lainnya yang membahas tentang isu dan tantangan layanan e-learning melalui studi literatur dan studi empiris di Universitas Esa Unggul.

BAB 2 Pelaksanaan Kegiatan

Kegiatan *International Conference on Computer Science and Artificial Intelligence (ICCSAI)* diselenggarakan pada tanggal 28 Oktober 2021 melalui Zoom meeting. Kegiatan ini dimulai dengan sambutan dari Prof. Dr. Ir. Widodo Budiharto selaku Conference General Chair. Selanjutnya, sambutan oleh perwakilan dari LLDIKTI III Jakarta Prof. Dr. Agus Setyo Budi M.Sc, serta sambutan oleh Rektor Universitas BINUS Prof. Dr. Harjanto Prabowo, dan Prof Tirta sebagai Wakil Rektor bidang Penelitian dan Teknologi.

The poster for the 2021 1st International Conference on Computer Science and Artificial Intelligence (ICCSAI 2021) features a dark background with yellow and orange accents. At the top left, it lists the website research.binus.ac.id/iccsai and the logo of the KONSORSIUM BIDANG KOMPUTER LLDIKTI WILAYAH III. The central logo is a stylized 'S' with 'ICCSAI 2021' below it. To the right, the conference title is displayed in large, bold letters. Below the title, a paragraph describes the conference as a scientific forum for students, lecturers, researchers, and scientists to share their knowledge and research. Two keynote speakers are featured in a photo: Dr. Derwin Suhartono from BINUS UNIVERSITY and Prof. Patrick Hénaff from UNIVERSITÉ DE LORRAINE. The 'SCOPE' section lists various topics such as Intelligent System and Machine Vision, Robotics & Control Systems, Internet of Thing and Robotics, Signal Processing & Analysis, Big Data and Information Technology, Computational Linguistic and Audio Processing, Computing & Processing (Hardware/Software), Foundations of Computing and Theoretical Computer Science, Software Engineering, Information Security and Networks, and Information Systems. Poster ICCSAI 2021

Kegiatan ini diisi oleh dua narasumber utama: 1) Dr. Derwin dari Universitas Bina Nusantara, Jakarta dan 2) Prof Patrick dari Unviersitas Lorraine, Perancis.

Dr. Derwin menjelaskan tentang prediksi *personality* pengguna berdasarkan *The Big Five Personality Traits*. Data dikumpulkan dari media sosial Facebook dan Twitter, kemudian data diberikan kepada *expert* di bidang psikologi untuk memberikan label *personality* berdasarkan unggahan *user* di media

sosialnya. Hasil penelitian ini menunjukkan bahwa di masa mendatang, personality dari user dapat diobservasi.

Narasumber kedua diisi oleh Prof Patrick Henaff dari Universitas Lorraine, Perancis, yang mempresentasikan tentang penggunaan kendali robot yang diinspirasi oleh manusia berdasarkan fungsi loop sensorimotor biologis yang mengendalikan sistem biologis. Loops ini didasarkan pada *specific neural network structures* yang disebut *central pattern generators* (CPG) yang tersirat dalam asal muasal dan pembelajaran gerakan *adaptive rhythmic*. Struktur ini dipelajari dengan membuat robot manusia yang mampu belajar gerakan berirama untuk *locomotion* (daya penggerak) atau untuk berinteraksi dengan manusia. Studi ini memperkenalkan konsep sinkronisasi, sebuah prinsip yang mendasari interaksi berirama antara manusia dengan *dynamic oscillators*. Pada penelitian ini, ditunjukkan bahwa robot manusia mampu berinteraksi secara bersama dan merespons manusia, seperti berjabat tangan, melakukan gerakan berirama secara kolektif, serta mengikuti gerakan tangan manusia.

Kegiatan ini dihadiri oleh sekitar 121 partisipan, dengan jumlah artikel sebanyak 81 yang telah diseleksi dari 190 *submission*. Dari 81 paper, 70 paper dari Binus, 5 paper dari UEU, 3 paper dari UIN Sayyid, 1 Tel-U, 1 Univ. Mercubuana, dan 1 UNJ. Paralel session diselenggarakan dalam dua sesi, sesi I pada pukul 10.30 – 12.00 dan sesi II pada pukul 13.00 – 15.00.

Penutupan diakhiri dengan pengumuman 12 best presenter setiap room dan 1 best paper. Dari Universitas Esa Unggul yang menerima penghargaan Best Presenter yaitu Bapak Habibullah Akbar.

Berikut ini adalah rincian *rundown* kegiatan ICCSAI 2021 dan susunan panitia penyelenggara kegiatan.

Abstract: The use of e-learning in higher education has been known since the late 90's albeit its development and adoption remained a slow process in higher education institutions. The adoption of e-learning is gaining traction as the Covid-19 pandemic hit the world in 2019 and become a necessity for all educational institutions. Although today the institutions have opted for e-learning as an alternative way to carry out the learning process, many are still not ready and facing difficulties in implementing, managing, and using it. This research aimed to investigate the issues and challenges of e-learning implementation during the Covid-19 pandemic at Universitas Esa Unggul. This research was conducted using exploratory research method by conducting literature study, observation, interview, and survey to examine the lecturer's and student's experiences and perspectives of the e-learning system. The questionnaire was adapted from an Information Technology Service Management perspective to gain data of e-learning satisfaction, availability of e-learning facilities, e-learning ease of use, availability of guidelines, availability of system supports, and to get feedbacks from the student and the lecturer. Based on the study, we identify the following seven e-learning issues: 1) e-learning infrastructure, 2) e-learning system integration, 3) e-learning policy, 4) e-learning support, 5) individual workload, timeliness, and 7) interactivities. E-learning infrastructure is a dominant challenge for Universitas Esa Unggul that requires special attention to improve on its support and regulation. This finding gives implications that improving e-learning service is essential to provide a better learning experience. The e-learning service includes the infrastructure, the system integration, the policy and regulation, IT support, the lecturer, and the interactivity. This research could contribute to the design of an effective model of e-learning service by giving more structured guidance on how to do readiness self-assessment and factors to be focused on.
